About

former medical student, I am a student programmer in 2nd year of software engineering, member of the Tdev and CPD communities, I am also Co-founder of PrograMe. Today I am on a personal web project allowing students like me and other autodidacts also to have free access to programming courses based on programming projects carried out and well documented. On the other hand, our startup prograMe which is currently in the initialization phase, I work as a back-end developer on one of his projects.

FORMATION

-Professional license in software engineering at the polytechnic institute DEFITECH

-Several non-paying training courses on OpenClassrooms and on youtube

Experience

-Realization of my portfolio
